

Title

BiddyPhone — The Bitcoin Mining Smartphone for the Unbanked

Mission

Empowering underserved populations by transforming smartphones into income-generating tools via solar-powered, off-grid Bitcoin mining.

Problem

1.4B adults unbanked, 3B without stable internet. Traditional mining is inaccessible and centralized.

Opportunity

Smartphones + Solar + Satellite = Decentralized Economic Access

Solution

A smartphone that mines Bitcoin (<1W), uses solar power, satellite sync, and distributes UBI (100 sats/day).

Impact

Deploy 100K devices, reach 1M+ people, enable local crypto economies.

Pilots

Kenya (solar + mobile money), Philippines (mesh-ready), Ghana (crypto-friendly).
